Editor News:

Seeing pencilings from so many places, have decided to write you a few myself if you have room to print them.

I was in Columbia last Nov. and had the News sent to the above address and like it very much, as it gives some accounts of friends and relatives I grew up with from the date 1871 to 1892, which time I came to the central part of Illinois, and have made my home here since. During that time we have had weather to go to extremes in both hot and cold, and had weather in general, but the winter passing away brakes them all. We have had the longest spell of extreme cold weather known here for many years, and we are still in the grip of winter. We have had the worst blizzard of the season, beginning Wednesday evening the 19th of March with rain and turning to snow and sleet. The damage to Telegraph and telephone service was great also can not be estimated to fruit and shade trees.

We were fortunate enough in this section not to have much wind the three or four days of heavy ice and snow. The outlook is the next 24 hours will remove all the ice from the trees, but the ground is covered with snow and ice. During the past week school children have gone to and from school on their skates as every place was covered with ice.

The general belief is that lots of wheat land will have to go to corn and oats as the wheat is killed, or believed to be. Farmers are finding themselves a month behind with their work. It is not worth while to comment on prices as every consumer knows they are extremely high. I see a letter from Mason City in the News some time ago where the writer, a Mr. Morrison, quoted the city as having 23,000 inhabitants, I have known the village for a number of years and the last census report gives a little less than 1900.
